AtomQuest Hackathon 1.0 — Submission Document

Submitter Vaibhav Satish Pardeshi
Email vaibhavpardeshi190@gmail.com
Phone +91 9923307579
College MMCOE, Karve Nagar, Pune
Submission date 19 May 2026

Submission Deliverables

Working live demo URL

<https://atomalignv.netlify.app>

Source code repository (GitHub)

<https://github.com/Vaibhav5771/atomalign>

Demo credentials

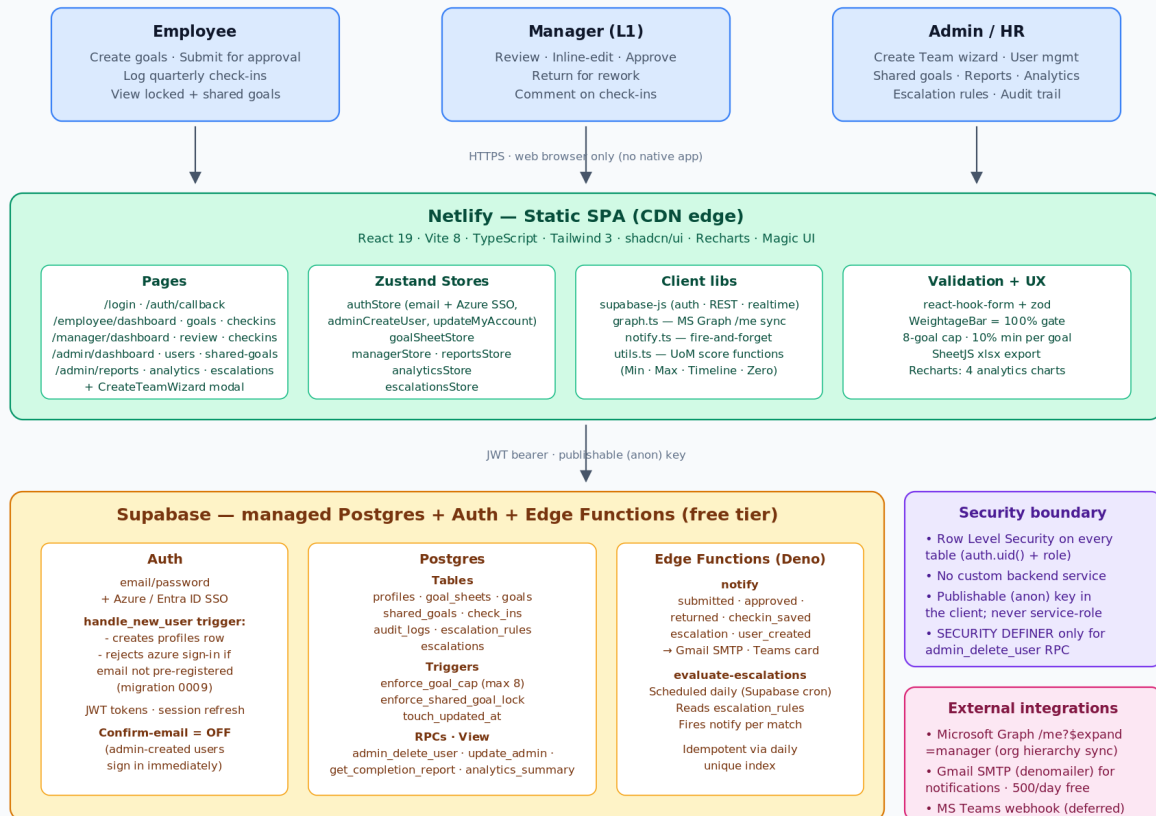

Single pre-seeded admin login. Manager and Employee accounts are created by the reviewer through the onboarding wizard that auto-opens on first admin sign-in. Real email addresses can be used so welcome emails and goal-event notifications land in inboxes the reviewer can read.

Email:	admin@demo.com
Password:	Demo@1234

Architecture Diagram

AtomAlign — Architecture

In-house Goal Setting & Tracking Portal · AtomQuest Hackathon 1.0

AtomQuest Hackathon 1.0 · Vaibhav · 2026-05-19 · BRD coverage: Phase 1 ✓ · Phase 2 ✓ · 5.1 ✓ · 5.2 ✓ · 5.3 ✓ · 5.4 ✓

Three-layer architecture: users (Employee / Manager / Admin) -> Netlify-hosted React SPA -> Supabase (Postgres + Auth + Edge Functions). Source SVG: context/architecture.svg.

Technology Stack

Frontend: React 19 · Vite · TypeScript · Tailwind CSS · shadcn/ui · Recharts · Magic UI

Hosting: Netlify (static SPA, CDN edge)

Backend: Supabase — managed Postgres + Auth + Edge Functions (Deno)

Auth: Email/password + Microsoft Entra ID SSO

Email: Gmail SMTP via Supabase Edge Function (denomailer)

Security: Row Level Security on every table; SECURITY DEFINER only for admin RPCs

Infra cost: ~\$0/month (Supabase free tier + Netlify free tier)

BRD Coverage

Requirement	Implementation
Phase 1 — Goal creation, UoM, weightage rules	Goal sheet with Thrust Area, UoM (Numeric / % / Timeline / Zero), targets, weightage. Validation: 100% sum, 10% min per goal, 8-goal cap (DB triggers + client zod).
Phase 1 — Manager approval workflow	Inline edit during review · Approve (locks sheet) · Return for rework · Admin can reopen approved sheets.
Phase 1 — Shared goals	Admin pushes a KPI to many employees; recipients adjust weightage only; title/target read-only; achievements sync from primary owner.
Phase 2 — Quarterly check-ins	Planned vs. actual per goal · status (Not Started / On Track / Completed) · system-computed UoM scores (Min / Max / Timeline / Zero).
Phase 2 — Manager check-in	Per-employee planned-vs-actual view + structured comment per goal.
Section 2.3 — Quarterly window enforcement	CyclePhaseBanner on both employee and manager check-in pages; shows current open window (May / Jul / Oct / Jan / Mar-Apr) and when the next opens.
Section 3 — Three roles with isolation	Employee / Manager / Admin with role-based routing and Postgres RLS policies.
Section 4 — Reporting and governance	Achievement export (CSV / XLSX), real-time completion dashboard, post-lock audit trail.
Bonus 5.1 — Microsoft Entra ID SSO	Live · Graph /me org-hierarchy sync · MS sign-in restricted to admin-pre-registered emails.
Bonus 5.2 — Email & Teams notifications	Email live via Gmail SMTP for 5 events (submitted / approved / returned / check-in saved / user_created). Teams adaptive card code-ready.
Bonus 5.3 — Rule-based escalation	EscalationsPage + scheduled evaluate-escalations Edge Function. 3-step SUBMIT_OVERDUE chain seeded. Escalation log visible to admin.
Bonus 5.4 — Analytics	QoQ trends · goal distribution · team completion heatmap · manager effectiveness.

5-Minute Happy-Path Walkthrough

- Sign in as admin@demo.com / Demo@1234. The Create-Team wizard auto-opens.
- Wizard Step 0: create a personal admin with your own email (admin@demo.com stays as fallback).
- Wizard Steps 1-2: add 1 manager + 1 employee using real email addresses.
- Sign in as the new employee → /employee/goals/new → create 2 goals (60/40 weightage) → submit.
- Sign in as the manager → review the submission → tweak one target inline → approve.
- Sign back in as the employee → /employee/checkins → log a Q1 actual.
- Manager opens /manager/checkins → reads the actual → adds a check-in comment.
- Admin opens /admin/analytics, /admin/reports (export XLSX), /admin/users — full loop complete.

Notes for Evaluators

- Confirm-email is OFF in Supabase Auth so admin-created users sign in immediately.
- First-tier Supabase + Netlify free — total infra cost is effectively zero.
- 12 sequential SQL migrations are committed under supabase/migrations/ (version-controlled schema).
- Live site auto-redeploys on push to main via Netlify.
- Detailed credentials walkthrough + Microsoft sign-in caveat in repo: context/demo-credentials.md.
